FEDERAL LEVEL

Executive
President & Cabinet

Judicial
Supreme Court

Legislative
Congress

STATE LEVEL

Governor’s Office

California Supreme Court

State Assembly

LOCAL LEVEL

Mayor’s Office

Superior Court

City Council
Exercise Objective: This exercise will help you explore and understand the scope, content, and organization of some of the databases that contain information about governments.

1) **RAND California** is a very good source for statistics on specific demographics. It is also a useful database for creating your own statistical charts or graphics for your assignments

   a) Go to **RAND California** and click on the **California Statistics** link. Explore the links you find there and write down some categories that look interesting to you. For example, under the link for **Education**, "SAT Scores" and under **Community**, "Number of Crimes" are interesting to look at.

   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________

   b) Now, from **RAND**, click on **What's New**. Write down two data collections that look interesting. Explore one or both of these collections. Look at the short descriptions of information at the top and at the dates in red. Now, tool around and design a graph by selecting various categories.

   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________

2) **CQ Researcher** publishes reports on current controversial topics. It's a great place to go to find background information on various issues and to find how the government may or may not be involved in these issues.

   a) Use the **Quick Search** feature to search for information about "hip-hop" or, if you prefer, try "gender and learning" as a topic. Describe the report that you find. What are some of the sections of the report that look interesting to you?

   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________

   b) Is **CQ Researcher** published by a government agency? ___________________
3) **CountryWatch** publishes information about all the recognized countries of the world.

   a) Use the menu under Shortcut to Country Review to select a country that interests you. Explore the different parts of the report for that country. List some of the different kinds of information you find in the report.

   ________________________________________________________________
   ________________________________________________________________
   ________________________________________________________________

   b) Return to the **CountryWatch** home page and next explore the “CountryWatch Data” section of the database. Choose 3 countries/regions from the first menu and “add” them. Choose the years you want to include by selecting from the “dates” menu. Choose 3 categories that interest you from the third menu. Click on “display results” to create your statistical report.
Exercise Objective: This exercise will help you to (a) understand the organization of information on government websites, (b) determine which government site is most appropriate for your information need, (c) think critically and analyze the way information is presented to you determine its relevance.

A) Select one of the following topics for this exercise:
- Club Drugs
- Baby Abandonment/Baby Surrender
- California Native American Heritage and Tribal Laws
- Los Angeles Neighborhood Crime Statistics

B) Select one of the following government websites for the topic you have chosen:
- www.usa.gov
- www.ca.gov
- www.lacounty.info
- www.ci.la.ca.us

Respond to the following questions with your observations and be prepared to report to the class about your search.

1. Which topic did you select?

2. Which government website did you choose to explore? Why? If more than one website has information on your topic, how is the information on each site different?

3. Describe what you found on your topic (reports, statistics, research findings, etc.)?

4. How relevant or helpful was this information to your topic? How could you use this information?

5a. Were you able to find the information by navigating through the structure and organization of the information or did you ultimately have to use the search engine to find what you were looking for? ______________

5b. How could this website be improved, especially to retrieve the kind of information you were looking for?
